Simpson Eye Associate's Refraction, Vision Care, Glasses and Contact Lens Policy

A refraction is a measurement of the lens power necessary to prescribe glasses or other corrective lenses. The refraction is an important component in determining the health of the eye. Most medical insurance plans, including Medicare, do not cover refractions or routine eye examinations. We charge separately for the refraction portion of the examination, since it is not a covered service.

The charge for a refraction is \$45.00

If you have a separate vision plan, it may cover routine or annual eye examinations, glasses and/or contact lenses. We do not file insurance for vision plans. We only file for Medicare, PPO's, HMO's and major insurance plans with which we participate. We will collect the charge for the refraction at the end of your examination today. If we file your insurance for you and we are paid for the refraction, a check will be mailed to you for the amount that your insurance pays.
